

Material Zones

Zone 1	Zone 2	Zone 3
<p>Look at the objects on the table. Think like investigators and ask these questions:</p> <p><i>Why are these objects here?</i> <i>Why has our teacher selected them?</i> <i>How are they different or the same?</i></p> <p>Write your own questions and stick them to your objects. Can anyone in your group have a go at answering?</p>	<p>Look at the objects on the table. Think like explorers and ask these questions:</p> <p><i>What do they feel like?</i> <i>What do they look like?</i></p> <p>You can use words like rough or smooth, flat or bumpy, sharp or blunt.</p>	<p>Look at the objects on the table.</p> <p>Work in pairs.</p> <p>Stand a large book up on the table and decide which one of you will sit behind it.</p> <p>Choose an object. Describe the properties of the object to your partner. See if they can guess what it is made of.</p> <p>Swap over.</p>
