

Primary Maths Year 2 Assignment 01

SUBJECT	Primary Maths Year 2
ASSIGNMENT	01
STUDENT NAME	

INSTRUCTIONS:

This assignment requires a video to be submitted to Canvas. You may only submit one video file per assignment. Please see the guidance 'How to Submit Video Assignments'.

For your child's Maths assignment, please follow the instructions found in the Main Activity of Step 3 Lesson 3. The instructions are below, too.

Film your child carrying out the number balance activity, or talking about the activity to the camera, to submit as part of Assignment 1. Ask them questions such as:

- How did / do you make the scales balance?
- What would happen if I put a 9 and 1 on one side? How would you make it balance with two numbers on the other side?
- Can you hang four numbers on the scales, two on each side, to make them balance?
- (Harder) Can you hang five numbers on the scales, two on one side and three on another, to make them balance?

Please note that the video should be short (no more than 5 minutes) and does not need to be a 'polished' video by any means. Its purpose is to give you and your child's tutor an idea of what they need to support their learning next.

TOTAL FOR ASSIGNMENT 10 MARKS
