

## Shared Scenario

A young woman wants to get married to her true love but her parents will not let her.

The woman is asking for help.

Which god or goddess might be interested in this problem?

What might they say?  
What might they do?

## **Shared Scenario – example recorded response.**

“I think I will help them“, said Venus kindly, because she cared more about love than any other god on Mount Olympus.

She sent Cupid speeding down to Earth and he fired swift arrows into the hard hearts of both parents. Their hearts softened until they realised that true love was more important than anything else.
