

Making a mobile

You will need

- scissors
- colouring pencils
- sticky tape
- pipe cleaners or straw
- string
- a photocopy of the pictures/boxes on this sheet (x2) to stick back to back on the strings.

What to do

Look at the pictures on this sheet. Decide who eats what and then cut out a selection of the pictures to make your mobile. You could also draw some animals and plants of your own and add these to your mobile. Stick your pictures back to back on your string to form a food chain. Remember each chain must start with a plant. Plants are primary producers. When you have made several food chains, hang them from a square frame made of straws or pipe cleaners.
