

**The Earth and planets move around the Sun.**

**The Earth's Moon appears to change shape throughout the month.**

**The Earth spins on its axis.**

**The Sun is at the centre of our solar system.**

**Stars don't move around the Earth.**

**Day and night are the result of the Earth spinning on its axis**

**There are eight planets in our solar system, each with unique features.**

**The stars in the night sky are still there during the day.**

**All of the planets in our solar system have their own distinct characteristics.**

**The sun is not a planet.**
